Work Experience

Alpha Vantage Software Engineer	2025/07 – Present Remote
- Building cloud infrastructure for real-time financial data and LLM-based data processing. - Developed MCP-compatible financial data interfaces for LLM clients and agentic workflows. - Built Alpha Vantage's TradingAgents fork into a deployable multi-agent LLM trading analysis product, integrating Alpha Vantage dataflows with API, worker, and web surfaces.	
Lingxin Intelligence , acquired by Zhipu AI Software Engineer	2023/02 – 2025/07 Beijing, China
- Developed backend services for AI chat applications with real-time chat, image/video generation, conversations, and bot management. - Built a GPU/CPU deployment pipeline enabling co-workers to deploy applications without manual intervention. - Managed cloud infrastructure and executed minimal-downtime database migration with continuous production availability.	
Alibaba Cloud Senior Software Engineer, Cloud Database Team	2021/05 – 2022/07 Beijing, China
- Led development of Alibaba Cloud database internal admin panel, optimizing high-frequency slow operations. - Developed metadata API services for serverless database and rebuilt workflow service by extracting common database operations.	
BizSeer Technology Software Engineer	2019/07 – 2021/04 Beijing, China
Developed AI for Ops applications, building reusable chart components for visualizing metrics, logs, and traces.	

Open-Source Contributions

y-agent: Personal AI Agent System luohy15/y-agent	Since 2025/02
- Built a personal AI agent system extending coding agents into daily workflows across todos, notes, calendar, links, finance, email, and knowledge management. - Designed session-tree orchestration with manager / dev / plan / impl / review sessions, traceable dispatch, callbacks, and human-steerable long-running sessions. - Implemented skill-based context injection, persistent memory, CLI-first tools, Telegram / web interfaces, MCP integration, and OpenRouter-compatible model routing.	
Alpha Vantage MCP Server alphavantage/alpha_vantage_mcp	2025
- Built the official Alpha Vantage MCP server enabling LLMs and agentic workflows to access real-time and historical financial data through Model Context Protocol. - Designed progressive tool discovery to reduce context/token cost while keeping broad financial-data tool coverage available to agents.	
TradingAgents, Contributor TauricResearch/TradingAgents	2025
- Added Alpha Vantage API integration with comprehensive support for stock data, technical indicators, fundamental data, and news sentiment. - Refactored data provider architecture, extracting specialized utility modules from monolithic codebase for improved modularity.	

Education

Tsinghua University Bachelor of Engineering in Computer Science and Technology	2015/09 – 2019/06 Beijing, China
